Firemin, there are some minor enhancements too. You are always welcome to review Firemin Portable and submit your comments. If you find it beneficial, then you can even leave a testimonial to be added in this review. Firefox is a sleek and fast browser that offers all the necessary features for a great browsing experience. One of its best features is its Multi-Processing Engine. This is the key reason why this browser is so fast. This feature ensures that Firefox utilizes multiple threads to execute multiple processes of an application simultaneously. Other browsers like Chrome, Opera and Safari are a bit slower than Firefox in handling multiple tabs. That is why this browser can multitask so quickly. Multi-Processing Engine The Multi-Processing Engine divides an application into several threads (if the multi-processing is enabled). Hence, this feature decreases the overall processing time of Mozilla Firefox. The first process is just an entry point for all other applications. This feature is enabled by default and some users may
