License.Q: Add html input field to  
jquery dialog I have a jquery dialog  
which contains editable text input  
fields. I have been able to add  
editable input fields to this dialog, but

---

the problem is that when I add a new input field, the name of the field is automatically appended to the end of the already existing input fields, such as below: when I add a new input field with the same name as the already existing one, it overwrites it, such as below: If I add a new input field with a different name, it creates the field, but again it overwrites the name of the previous field, such as

---

below:

The TARDIS Crack+ [Mac/Win]

Yahoo Widget Engine More about the  
TARDIS Visit [www.whizzer.de](http://www.whizzer.de) Bug  
reports: See the bug report list at the  
bottom of the screen Features:   
(de)materialise the Tardis on double-  
click Installation: Unzip the zip file  
you downloaded into a directory on  
your hard drive. Double click on the  
newly unzipped TARDIS folder, then  
choose "TARDIS/Tardis Widget" and  
follow the instructions from there.

---

Update: The newest version can now be downloaded from here. It is compatible with all Tardises that support the old typeface (Tardis.ttf) and that don't support the blink effect (for some reason). Other versions: [?](#)
