The majority of Photoshop's features involve a combination of an adjustment layer and Photoshop's "cropping tool," which I discuss in Chapters and, but Photoshop's arsenal of tools offers lots of other useful features. Photoshop's layers are the most important concept in image editing. They enable you to organize and track changes to images. You can use the Photoshop interface shown in Figure 1-1 as your guide to organizing and creating images, or as a template for creating similar images. The sections that follow give tips and strategies for using Photoshop on the photo, graphic, or Web designer's level of comfort. Photoshop is now the industry standard so users swear by it. Some people compare it to the machine gun of the imaging world. Although it's true that Photoshop has a huge number of features, a primary reason for its popularity is that the interface is very user friendly. I give you tips throughout this chapter for learning Photoshop quickly. Photoshop's arsenal of tools enables users to quickly organize and manipulate images. Check out Figure 1-2 for a closeup view of the tools. Along with these tools you find the Photoshop tools palette, a color picker, several filters, and the curves tool, which I cover in the next few sections. **Figure 1-1:** You can use Photoshop as a template for creating similar images. Illustration by Wiley, Composition Services **Figure 1-2:** In the Tools palette, you can use layers, the paintbrush tool, and a selection tool to edit photos. With each action you take in Photoshop, you place a new layer atop the original image. The layer represents the new action; all previous actions will remain on the original image. When you're finished with the image, you can remove all your actions as a group, but they will remain on the original image. If you need to get back to an earlier action, you can use the Undo command (Ctrl+Z) to remove that action. If you make a mistake, you can use the Redo command (Ctrl+Y) to reapply the previous action. The Photoshop application can be extended beyond the standard editing features of composition, color, and style. Many image-editing extensions and plug-ins are available for Photoshop. These add features such as the ability to blend two images, resize or distort an image, create and edit color swatches, add textures, and insert other elements, such as

The European Union's chief justice has told a think-tank that Britain should not have the right to veto treaty changes made in the bloc, as it would make it harder for the EU to hold members to account for human rights abuses. Franco Frattini, the European commissioner for justice, home affairs and internal affairs, says that to make the European Court of Justice the guardian of the EU's treaties, with the power to veto changes, would unnecessarily thwart the court's role. "The idea is only to enlarge the area of the European Parliament's competence," Frattini told the magazine Demos, published on Tuesday. "This means that the European Parliament should be able to make proposals on the basis of democratic legitimacy. Not by a resolution, but through the normal course of lawmaking by the European Parliament. And by this I mean that the European Parliament must be able to refuse a reform proposed by the commission in the first instance. "That is the choice: you accept European integration as a means or you do not. But that choice is not a choice between more or less integration. You cannot have more integration if you accept the choice that there is no choice." In his article, the former Italian justice minister argues that there is no constitutional basis for the veto, which would open the way for Britain to block the adoption of tighter controls on parliamentary immunity. Erich Wildermuth, the Brussels head of the European platform of the International Association of Prosecutors, said that the position was a radical development of the idea that countries could veto treaty changes within the EU. The article prompted accusations that Frattini's intervention was biased against Britain, as he was the justice commissioner when the British veto over Europol led to the row in the summer of 2005. Chris Doyle, the shadow justice minister, said Frattini had been "inundated with letters" of complaint from prosecutors' groups. "The European legal system is a key ally of law and order throughout Europe and we will need his support at the forthcoming crime summit to defeat moves to put fugitives back on the streets," Doyle said. "Franco Frattini is being advised by the commissioner for justice, home affairs and freedom of movement and I urge him to reconsider his position, which will cause huge anger throughout Europe." The Socialist MEP Dieter-Lebrecht Kohns said the article was "yet another clear example of German power and influence from the German political establishment". "If the British
