User Reviews Review from Aug 2018 "Now that I've got used to searching using Unicode, it's clear to see how useful this is. I wish there were a lot more options to choose from. But other than that, it's just the character map, right?" Review from Jul 2018 "This is a great program to have in the default applications. You can edit the clipboard and even allow files to get copied over when entering text. Just keep in mind you can't copy and paste without Max2k Symbols. This is a great program!" Review from May 2018 "This is by far the best character map and font I've ever used. I was impressed to find that it seemed to have most of my document-producing programs installed. But then I saw that it could be controlled via keyboard shortcuts! That's a complete game changer, and I can use most of my keyboard as well as mouse to navigate. This is the closest thing to the perfect workflow that I've ever had. Thanks!" Review from Apr 2018 "This looks pretty basic, but I prefer to use both WinCharMap and Max2k Symbols for my work, and my MacOS character map. If you want to take the frustration out of searching for symbols using a mouse, then this is a huge time-saver. I've tried other character maps with a larger selection, but none of them could match the professional touch and easy-to-use interface of Max2k Symbols. Definitely worth the download!" Review from Mar 2018 "I did not know Max2k symbols existed, until I tried it out. I can type any language symbol with out pause, and also change the size of the font, which I use all the time.
