XML-based solutions including XMLAD. XMLAD allows AutoCAD to read and write additional or replacement schema. XMLAD is a proprietary AutoCAD-only XML-based scripting language based on DXF. AutoCAD 2009 introduced the ability to use the XMLAD syntax on a Windows platform, enabling it to be used from within programs written in Visual Basic, C++, C#, Delphi, C++ Builder, Visual Basic, J#, Python, JavaScript, VBScript, ASP, ASP.NET, XML, and other programming languages. Visio-based solutions, especially Visio macros and also VSPX and Visio VSTO. Visio Macros are AutoCAD-based add-ons to Visio designed to speed up drawing tasks and create custom macros. VSPX is a set of Visual Studio macros that can be used to automate the process of creating Visio models that correspond to a particular AutoCAD drawing. Visio VSTO is a collection of components for the Microsoft Visual Studio framework. User-defined functions: User-defined functions (UDF) are functions stored in the database that are created and edited by the user. They are more flexible than

macros and can be used with all AutoCAD and ArcGIS applications. UDF can be created in AutoCAD and ArcGIS and sent over the network for use by programs such as MapPoint. Web Applets or AJAX: Web Applets and AJAX allow users to make AutoCAD drawings that are interactive and update themselves as the user changes the drawing. The user is not required to leave the AutoCAD application. Web Applets can be used to provide a common presentation layer to Web pages. AJAX provides a method for developing applications and web pages that interact with each other. Web Services: Web Services provide a programming interface between AutoCAD and the rest of the world. AutoCAD supports web services in all its products. OpenOffice: In 2011, Autodesk and the Free and Open Source Software Foundation announced that they had agreed to collaborate on a free office suite called OpenOffice.org for Linux, which will provide a Microsoft Office-like experience to users. Customization AutoCAD can be customized for specific industries through the use of add-ons. These are created by companies selling add-ons and by registered developers. There are several major community-based repositories of AutoCAD add-ons. Optimization ca3bfb1094
