AutoCAD Release History AutoCAD is not a static program, but a constantly changing product. In the early years of AutoCAD, developers added features one at a time. As new versions of AutoCAD were developed, they usually replaced features from older versions. However, many features were added in various versions of AutoCAD that are not completely compatible with earlier versions, or not compatible at all. AutoCAD Release Sequence AutoCAD began in the 1960s as a package of four related programs called the Autocad Authoring System (ACAD). Each of these programs was developed by the Manly, Chalkley & Faulkner (MCA) company (MCA had been acquired by Gilman Graphics). MCA was the first company to develop a commercially released graphics application that provided a bridge between a vector-graphics graphics terminal and a computer running the Amiga and Atari ST computer operating systems. During the late 1980s and early 1990s, AutoCAD continued to grow and develop, and MCA and the renamed Gilman Graphics merged to form the Autodesk company. Later, the new Autodesk company also bought the half of the MCA business that was not absorbed by Autodesk. Since the early 1990s, the Autodesk AutoCAD product line has been updated roughly every four years. In 2007, AutoCAD 2009 was released, and then AutoCAD 2010 in 2009. AutoCAD 2013, released in 2012, was based on AutoCAD 2009, and was fully compatible with AutoCAD 2008, AutoCAD 2007, AutoCAD 2006, AutoCAD 2005, and AutoCAD 2004. In 2017, AutoCAD 2020 was released. AutoCAD 2019 was based on AutoCAD 2016, AutoCAD 2017, AutoCAD 2018, and AutoCAD 2019. Table 1 summarizes AutoCAD Release History from 1982 to present. The table has two columns, the first of which contains an abbreviated version of the original release name; the second column lists the release number of the current version of AutoCAD. Open Autocad and use the menu to "File > Open from CD-ROM..." (from the File menu) Enter the path in the field for Autocad startup Click Open. Choose the option "Start from windows". You may need to set "Allow the following programs to start when you turn on the computer" in the "Startup and recovery" section of Windows in order to have Autocad start on boot up. Use the "Key" field for the Autocad Keygen, but change it to the correct "Autocad Version Number" you are using Click the "Save as Text" button and save it on your computer. Note: Your license key may be read as 32 or 64 bit. By default it is read as 32 bit, so you should set the 32 bit version of the keygen to only allow 32 bit software activation Copy the key from the keygen and paste it into the "Key" field of the Autocad Options window. When asked to activate the Autocad product, choose to run the license key generator. 1. Run the Autocad License Generator (Important Note: if you are using 64-bit Autocad, you should use the 64-bit version of the autocad license generator) Run the autocad license generator by double clicking on the LicenseGen.exe file in the "C:\Program Files\Autodesk\AutoCAD 2013 Runtime\License Generator" folder The License Generator will open up and run as a separate window and you will see that a window appears that will ask you to login to Autodesk Support. Enter your Autodesk Account ID and password. You will not see any messages from Autodesk Support as you need to enter the Autocad license code (key) that you copied from the keygen. Select the 1.1 version of the license key for your Autocad product from the drop down list and then click OK. If you are using a 64-bit version of Autodesk product, then you must run the 64-bit version of the Autocad license generator. The License Generator will run and a message will appear that the license key was successfully copied to the Autocad license file. Your Autocad License file is located in "C:\Program Files\Autodesk\AutoCAD 2013 Runtime\Licenses
