My old Windows update required several hours of re-downloading Windows and all of my software. Then I started getting notification prompts to restart. I will never trust the Windows update again. But, Imgur has worked perfectly for me in the past. So I have been downloading their albums and resaving them to my drive. Its all done at the touch of a button. Pros Cons I'm satisfied, the Windows 10 update worked perfectly without a problem. I already knew that you shouldnt use the Windows Update option for any Windows update, as it will likely take a day or more to complete. One of the best and easiest methods of downloading from Imgur for me has been [imgur.com/download\\_album](https://imgur.com/download_album). I can download the whole album from an album or a single picture. Its very simple and easy. I like the GUI and its very easy to use. I use to use the search on [Imgur.com](https://imgur.com), but this is an option that Imgur album downloader has so its not a requirement of the program. I would recommend it to anybody. This program is very easy to use and simple. Overall, Imgur album download
