In the video, you'll see the tool in action on a face to make a collar to fit an image. You can use feathering in the same way. You can also use the Brush tool's built-in pen tools to create brush strokes. You can even use brush strokes in these tools. You can also access brush strokes and pen tools in other tools, like the Gradient tool in the Curves tool. You'll need to select "Brush" in the menu bar in order to use these options. You can switch to the Brush tool in the Free Transform tools panel to create basic strokes, or apply strokes from another layer. The new eight-channel LAB channel mixer lets you adjust colors to make them even more vibrant. In addition, there is a fully accessible "Highlights" panel for the Colors, Shadows, and Contrast channels, which makes it easier to make adjustments to parts of the image. Overall color can also be adjusted via highlights and shadows, or you can use highlight and shadow brushes.
