Sara says yes, and the problem may have been that I put Photoshop into editing program mode, which works differently than either my Viewer or Library modes. When you use Photoshop as an Editor, you still can preview your image at all times. The App Preview button shows an image in an identical state to the one you'll see when you make your final image. It's just there as a reference. This is an excellent question and I too am a little confused by the older behavior. While I didn't check for a fix on Google, my best guess is that Photoshop just used a different preview method. It may have started using a file open dialog when it began using the smart previews with the Developer version 8.0 and changed it at some point to use the 'File' tool. I can only speculate on this, however. An update to Lightroom could update the behavior or if the behavior changed at some version of Photoshop, I'd need to head back to Adobe to figure out when it changed. If you want to change the behavior, go to File > Preferences > Preview > Display. Thank you – your review has been most helpful. I ran into a similar issue. I was using the smart previews and found my images were saving to my computer as.pjpeg with a UPLOADED.pjpeg file watermark. It turned out that I had accidentally changed some settings while trying to figure out how to make my images open in the viewer automatically – I changed the "Resolutions > File open behavior" and it opened like normal. Lightroom had automatically applied the new behavior. When I realized it was changing to save the images as.pjpeg with a UPLOADED.pjpeg file watermark, I changed the settings back to match my old behavior and the images saved appropriately.

Most likely the most noticeable update in the past five years is the one Adobe added to the brackets of the title bar of the workspace. With this new approach, the application's name is now displayed if it is currently paused or if the user clicked on the word "Save" in the "Save" panel. The "File" row that once only displayed file name and status now eases users by including image size, type and scale. To this thanks we should add the addition of a background,

typically a gray rectangle with a white stroke, to the central area of the window. Finally we can mention the implementation of a new "Autosave" option to automatically save a modified image, and the ability to share such a file on the Web directly from the application. The new user experience is a welcome improvement, but in the end, it's the professional arsenal of tools that help separate Photoshop from its competition. Among these is the new Auto Mask feature, which automatically detects edges from the image and adds a layer that surrounds these. Professionals can use it to clean up photos no matter if they are RGB, CMYK, or any of the other various color modes. The various Photoshop Brush features and filters will be carried over from the previous version, but if you're wondering how the application's 2D drawing tools have improved, it's safe to say that we're not talking about a comprehensive refresh. Instead, it's a collection of subtle, but useful, interface tweaks.

In 2020, you'll want to experiment with Save for Web – Selective, which offers you different ways to save files to ensure you get the full potential of your artwork by creating the right file-type suitable for print or screen. There are a couple of important Save options worth checking out in Adobe Camera Raw (version 18.7), including Reduce noise. This option will reduce the increased noise from the smoothing filter, introduced in Camera Raw 19. Saving your image in Photoshop for the web with Save for Web – Save for web will save your image as a separate file. The file-type it saves is the same as the image you save at the end of your editing session. This version of Adobe Photoshop CC contains a new Split View option, which allows editing elements in one part of the screen to be seen in the other. And finally, a new Stacks view for working with layers and groups. A new edit path feature provides what object users need with editing the curves, when they come to the creation of the path, you only need to press the space. New icons.
